Dear Entangled_Nets,

We are pleased to announce that you are the runner-up of our Open Hackathon portion of QHack 2021. Congratulations to the team members: Eraraya Ricardo Muten, Togan Tlimakhov Yusuf, and Andrei Voicu Tomu!

We were really impressed with your ability to tackle a serious High Energy Physics problem with Quantum Machine Learning in just one week! As a result you have secured the second place spot out of 400+ active teams. Your Grand Prize is up to three 2021 summer internships with CERN. This includes a 1500 CHF stipend per person.

Thank you for participating and congratulations again!

The Xanadu QHack Team
