Certificate

This is to certify that

Togan Tlimakhov Yusuf

has participated in the second global **CERN Webfest** event
held over the weekend of 21–22 August 2021.

CERN Webfest is CERN's annual hackathon based on open web technologies bringing together bright minds to work on creative projects. Participants work in small teams, often designing web and mobile applications that help people engage with CERN's research, physics, or even science in general.

The theme for this year's event was **'science, society, sustainability'**. Given the global COVID-19 crisis, participants were working on projects addressing the evolving ways in which we do science.

Thanks for contributing to the 2021 CERN Webfest!

Geneva, 23 August 2021
